EcoPolyFire® is a building technology using high-strength polypropylene with integrated tanks and body in a monoblock structure. More advanced, heavy-duty and lighter bodies, maximizing the tanks and lockers capacities.

25 YEARS WARRANTY

Flexibility: EPF® can absorb the energy and dissipate it in the surface, avoiding the tension concentrations which produce failures

Maintenance: EcoPolyFire does not need any preventive maintenance during its complete lifecycle

Density: Significantly lighter than conventional body systems allowing to increase the payload and therefore the tank capacity

Compartments: High flexibility in interior design
Maximizes cargo capacity

Monoblock Concept Design: It allows the use of 100% bodywork volume

Recycling: All components built in EcoPolyFire are 100% recyclable

High Thermal Resistance

Potability: Tanks made of EcoPolyFire are compatible with the use of drinkable water

100% Corrosion-free: The material is fully resistant against corrosion
